RESPONSE TO RESTRICTION REQUIREMENT

Commissioner of Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

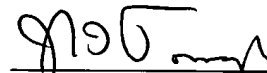

Responsive to the Office Action mailed December 9, 2003 and the restriction requirement made therein, applicants provisionally elect, with traverse, Group I, claims 1-5, drawn to a method for reworking an electronic component.

Applicants traverse the restriction requirement on the grounds that 35 U.S.C. § 121 authorizes restriction only when the claimed invention is "independent and distinct" (emphasis added). A search of the subject matter of Group II, claims 6-10, drawn to an apparatus for reworking an electronic component, and Group III, claims 11-15, drawn to a reworked electronic component reworked using the method of the claims of Group I,

would necessarily require a search of the subject matter of Group I, claims 1-5. It is submitted that the method claimed in Group I and the apparatus and reworked electronic component claimed in Groups II and II are not directed to independent and distinct matter.

Action on the merits of the claims of Groups I, II and III is respectfully requested.

Respectfully submitted,

John J. Tomaszewski
